31st August, 2017.

Dear *Sir,*

Government of India has launched National Water Mission (NWM) under National Action Plan for Climate Change guided by Prime Minister's Council. The main objective of NWM is "conservation of water, minimizing wastage and ensuring its more equitable distribution both across and within States through integrated water resources development and management". Under the mission every State and Union Territory is being supported to formulate a **State Specific Action Plan (SSAP) for Water** for sustainable development and management of their water resources by linking with the respective State Action Plan for Climate Change and other sectoral plans. The SSAP includes preparation of State Water Budget.

The State Specific Action Plan on water is a multi-disciplinary activity requiring active participation of all Government Departments related to water from supply side, demand side, governance side, technology side and environment and climate change perspective and also that of non-government agencies and citizens. Thus, State/UT Governments need mentoring and guidance in the formulation of plans through convergence and synergy.

In this regard, Wadia Institute of Himalayan Geology, Dehradun has been requested to provide templates for **Glaciers and Springs** for the proposed SSAP draft template.

The representative of Wadia Institute of Himalayan Geology did attend our meeting dated 26.7.2017 and assured us to make available the draft templates of **Glaciers and Springs** in a week's time. Regrettably, even after a month the inputs are awaited. A number of telephone requests are made but yielded no results.

Under the circumstances, may I earnestly request you to kindly depute Director, Wadia Institute of Himalayan Geology, Dehradun to attend a meeting at 11 AM on 4th September, 2017 at National Water Mission on the said subject.

Earnestly seeking your kind help.

With warm regards.

Yours truly,

(Dr. Mahammed Ariz Ahammed)
