Borewell Recharge Structure

I.	Work Name Structure	: Borewell Recharge
II.	Place of work	: ZPHS Gattubuthkur
III.	District	: Karimnagar
IV.	Name of the Mandal	:Gangadhara
V.	Name of the Grampanchayat	:Gattubuthkur
VI.	Work Id	: 202552717016170438
VII.	Estimation Cost	: Rs.25,389
	Wage	: Rs.1445
	Materials	: Rs.23,944
VIII.	Expenditure	: Rs.21,613
	Wage	: Rs.1463
	Materials	: Rs.20,150
IX.	Persondays Generated	: 7
X. Brief about the work, implementation process, and any other highlights: A dried bore well in government school is taken as pilot to construct borewell recharge structure in 2018. After executing this work the Borewell became functional. Even the surrounding Eight (8) Bore wells and Twelve (12) Open wells got recharged. The ground water levels in the Gram Panchayath increased enormously. There was no need for the farmers to wait for rains as there was abundant availability of Ground water. As a result there was a rise in Agriculture production and also the drinking water problem in the village was solved forever. Previously the farmers cultivated single crop due to non availability of Ground water. But now they raise crops throughout the year. The burning drinking water problem during summer suffered by the villagers from decades got solved and the people are very happy.

Farm pond

I. Name of the District	: Karimnagar
II. Name of the Mandal	: Choppadandi
III. Name of the Panchayat	: Bhupalapatnam
IV. Name of the Beneficiary and Job card number	: Madipelli Ellavva-
V. (a) Name of the Asset	: Farm pond
(b) Work ID	: 202553007004170144
(c) Location of the Asset	: Madipelli Ellavva
(d) Latitude & Longitude	: 18 58 25' 29'' 79 19 02' 05''
VI. Estimation Cost	: Rs. 19392
Wage	: Rs. 13292
Materials	:Rs. 6100
VII. Expenditure	: Rs. 11502
Wage	:Rs. 11108
Material	:Rs. 394
VIII. No. of Persondays Generated	: 51
IX. Work Start Date & Work End Date	: 19 th August 2019
X. Brief about the work, implementation process, and any other highlights:	
Madipelli Ellavva used to cultivate cotton crop. Her only source of irrigation was rain fall. After digging farm pond in her agriculture land, she is able to raise vegetable crops, fodder grass etc utilizing water from the farm pond for irrigation and earn extra income. She is also rearing fishes in her farm pond. Thus the farm pond in her farm is able to provide multiple financial benefits to her.

Individual Magic Soakpit

I. Name of the District	: Karimnagar
II. Name of the Mandal	: Chigurumamidi
III. Name of the Panchayat	: Kondapur
IV. Name of the Beneficiary and Job card number	: Golla Saraiah
V. (a) Name of the Asset	: Individual Magic soakpit
(b) Work ID	: 202535315010170499
(c) Location of the Asset	: Golla Saraiah house
(d) Latitude &Longitude	: 17 46 82' 01" 78 69 11' 02"
VI. Estimation Cost	: Rs. 4516
Wage	: Rs. 825
Materials	: Rs. 3691
VII. Expenditure	: Rs. 4191
Wage	: Rs. 831
Material	: Rs. 3352
VIII. Work Start Date & Work End Date	: 2nd September 2019 to 30thOctober 2019
IX. Brief about the work, implementation process, and any other highlights:	
<p>Kondapur is a small village in chigurumamidi mandal. There is no proper drainage facility especially in Kaasi vaada. People suffered a lot with stagnation of grey water on the roads. The stagnant water became breeding place for Mosquitoes. Thus diseases spread by Mosquitoes like Malaria & dengue are common in the village. Golla Saraiah & others have come forward for construction of soak pit in their houses.</p> <p>All the grey water is allowed to flow into the Soak pit. Thus the roads and surroundings in the villages are free from stagnation, foul smell and breeding of mosquitoes. This also helped in harvesting rain water and improving ground water table.</p>
