Respected sir, We have installed the rain water harvesting system at auditorium building in Indian institute of tourism and travel management Gwalior campus under the campaign.

Through this system the water source(bore well) will recharge directly through the purified rain water. It will refill the dry water table of borewell and rejuvenate it.

System is based on river water purification system and ancient rain water filtration system. It has inner water circulation and pressure generation system with flow control.

This will refills 961000 liter pure water annually in the campus borewell. Total

covered roof area 10000 square feet. System needs cleaning once in a year and complete in 30 minutes. No maintenance cost. 100% natural [filtration.no](http://filtration.no) surface contact.

Acid,dirt,suspended partical, turbidity,extra hardness and pathogens free pure [water.no](http://water.no) digging or setteling tank required. Save pure water. Jai Hind jai Bharat.
