Subject : **Regarding Rainwater Harvesting system of the University.**

Sir,

Please refer to your D.O. letter No.M.65022/01/2020-NWM/1414 dated 26.06.2020 in respect of Rainwater Harvesting system of the University.

It is submitted that the Jamia Millia Islamia has 239 acres of land. The University has already taken initiatives by constructing structures/wells for rain water harvesting. Twenty-three number of rainwater harvesting structures spread over the entire Campus have already been constructed for the purpose of ground water recharge with the following aims:

- Rise in the ground water level;
- Reduce the soil erosion;
- Appreciable improvement in the quality of water;
- Improvement in the discharge of tubewell;
- Increase and development of greenery in the Campus.

Further, provision of rain water harvesting system is being made in all new buildings. A survey was conducted recently and found that eight new rain water harvesting system are required in old buildings to improve the ground water level and improve the discharge of tube well of that area and the cost will come around Rs.50 lakhs (approx.) to construct the rain water harvesting system.

A list of rain water harvesting system in the Jamia Millia Islamia, New Delhi along with relevant pictures are enclosed for your kind perusal.

Thanking you,

Yours sincerely,

(A.P. Siddiqui) IPS
Registrar
